

Your members have risk factors that are not being captured and documented, increasing their risk for adverse health events and impacting the reimbursement you receive.

Matrix Medical Network better engages and connects with members and other at-risk populations to deliver the care and support they need. The level of insight gathered goes beyond what is possible in a typical clinical setting.

Reaching members on their terms

Matrix Medical Network's community-based nationwide network of clinical providers meet with members where it is most convenient and effective for the member. With care delivered in the home or on one of our mobile health clinics, Matrix can help your plan overcome common barriers to care and offer more options for improved outcomes. We treat each interaction with your members as an opportunity to strengthen your relationship and build positive brand perception.

Our approach has achieved a 96% member satisfaction rate

Unparalleled Member Insights

The Matrix Comprehensive Health Assessment (CHA) helps improve quality of care and close care gaps, positively impacting reimbursement and overall quality performance. We thoroughly review a member's current health, medical history, medication adherence, social environment and other risks that can be difficult to capture during routine office visits to provide unmatched insight about a member's overall health.

QUALITY CODING, IMPROVED RISK MANAGEMENT

Matrix adheres to the highest clinical standards with our documentation and coding to ensure compliance and reduce risk. In fact, we were found to have 99.5% ACCURACY in our coding according to bi-monthly external audits.

The Matrix Difference

Our state-of-the-art mobile health clinics (MHCs) are equipped with sophisticated diagnostic technologies including laboratory, ultrasound, EKG and mammography equipment, expanding the scope of diagnostic and preventive services that we provide.

This innovative capability ensures that health plan members have even greater choice and convenience in accessing important care and preventive services, giving Matrix the most comprehensive and engaging set of population health solutions in the industry.

Our Extensive National Network of Providers

- Evaluates members' medical history, current health, medication adherence, living conditions and support systems
- Connects members with primary care physicians, care management programs and local support resources
- Ensures accurate diagnosis to align financial payments with appropriate risk
- · Completes lab screenings and tests when appropriate

Contact us today to see how we can help identify and address the risk factors affecting member health.

Our CHAs help you address important quality measures, close common care gaps, and improve performance on key quality measures

Matrix offers basic screenings and tests as well as advanced diagnostics, depending on the venue chosen. Additionally, our mobile health clinics provide a convenient option to complete needed tests and screenings in a single encounter.

Tests include:

- · Abdominal Ultrasound
- · Diabetic Retinal Exam
- Echocardiogram
- · Fecal Immunochemical Test (FIT)
- · Hemoglobin Alc screening
- · Kidney (nephropathy) screening
- Mammography
- Microalbumin screening
- · Neuropathy screening
- · Osteoporosis screening
- · Peripheral Artery Disease (PAD) Test
- · Vascular disease imaging
- · Vision/hearing screening
