ZANFEL® FACTS:

Zanfel is a specially formulated wash that is clinically shown to remove urushiol, the toxin found in poison ivy, oak and sumac, from the skin and relieve itching **ANYTIME** after outbreak.

- Offers relief within seconds of washing
- Safe and effective during any stage of the allergic reaction
- Safe for the face and genitals
- Safe for use by children and pregnant or nursing women
- There are no known side effects
- Sold in First Aid section of pharmacies nationwide

ZAN107 Vers. 03/20

Directions for Use

ZANFEL

Wet the affected area.

Squeeze 1 and 1/2 inches (no less; see ruler below) of Zanafel onto one palm. (Product will not work if less than 1 and 1/2 inches is used.)

Wet and rub both hands together for 10 seconds, working the product into a paste. (This will activate the ingredients. Do not bypass or modify this step.)

Rub both hands (up to 3 minutes, if needed) on the affected area, working Zanafel into the skin until there is no sign of itching (15 seconds is typical for mild to moderate reactions).

Rinse area thoroughly. If the itch returns (which could be several hours later), rewash, following steps 1 through 5, and read the Q&A insert found in the package.
