

Focus on WOMEN'S HEALTH

Because Everyone is Unique.

Everyone is Unique.

INNOVATIVE PERSONAL SERVICE AND WOMEN'S HEALTH TESTING OPTIONS

A MORE PERSONAL

APPROACH TO

WOMEN'S HEALTH CARE

Everything you do, from thorough patient consultations to the time you put in to diagnose difficult cases, makes it evident that you take women's health care personally. *And so do we.*

As a women's health care professional, you know that every patient brings to your office a unique history, physiology and set of symptoms. Understanding that *everyone is unique* is what makes your practice stand apart in delivering medical care that truly promotes a woman's well-being from a variety of perspectives.

We understand that a woman's health care needs change with every stage of her life. We know that tests need to reflect the latest scientific findings, such as results from clinical trials and studies on women's diseases and conditions. With LabCorp and its subsidiaries, you get more than the comprehensive test menu, infrastructure, and resources that you need—you also get a dedicated partner in caring for women's health.

Everyone is Unique.

WE DO RARE DAILY

LABCORP

INNOVATION

Looking for a test? Look to LabCorp.

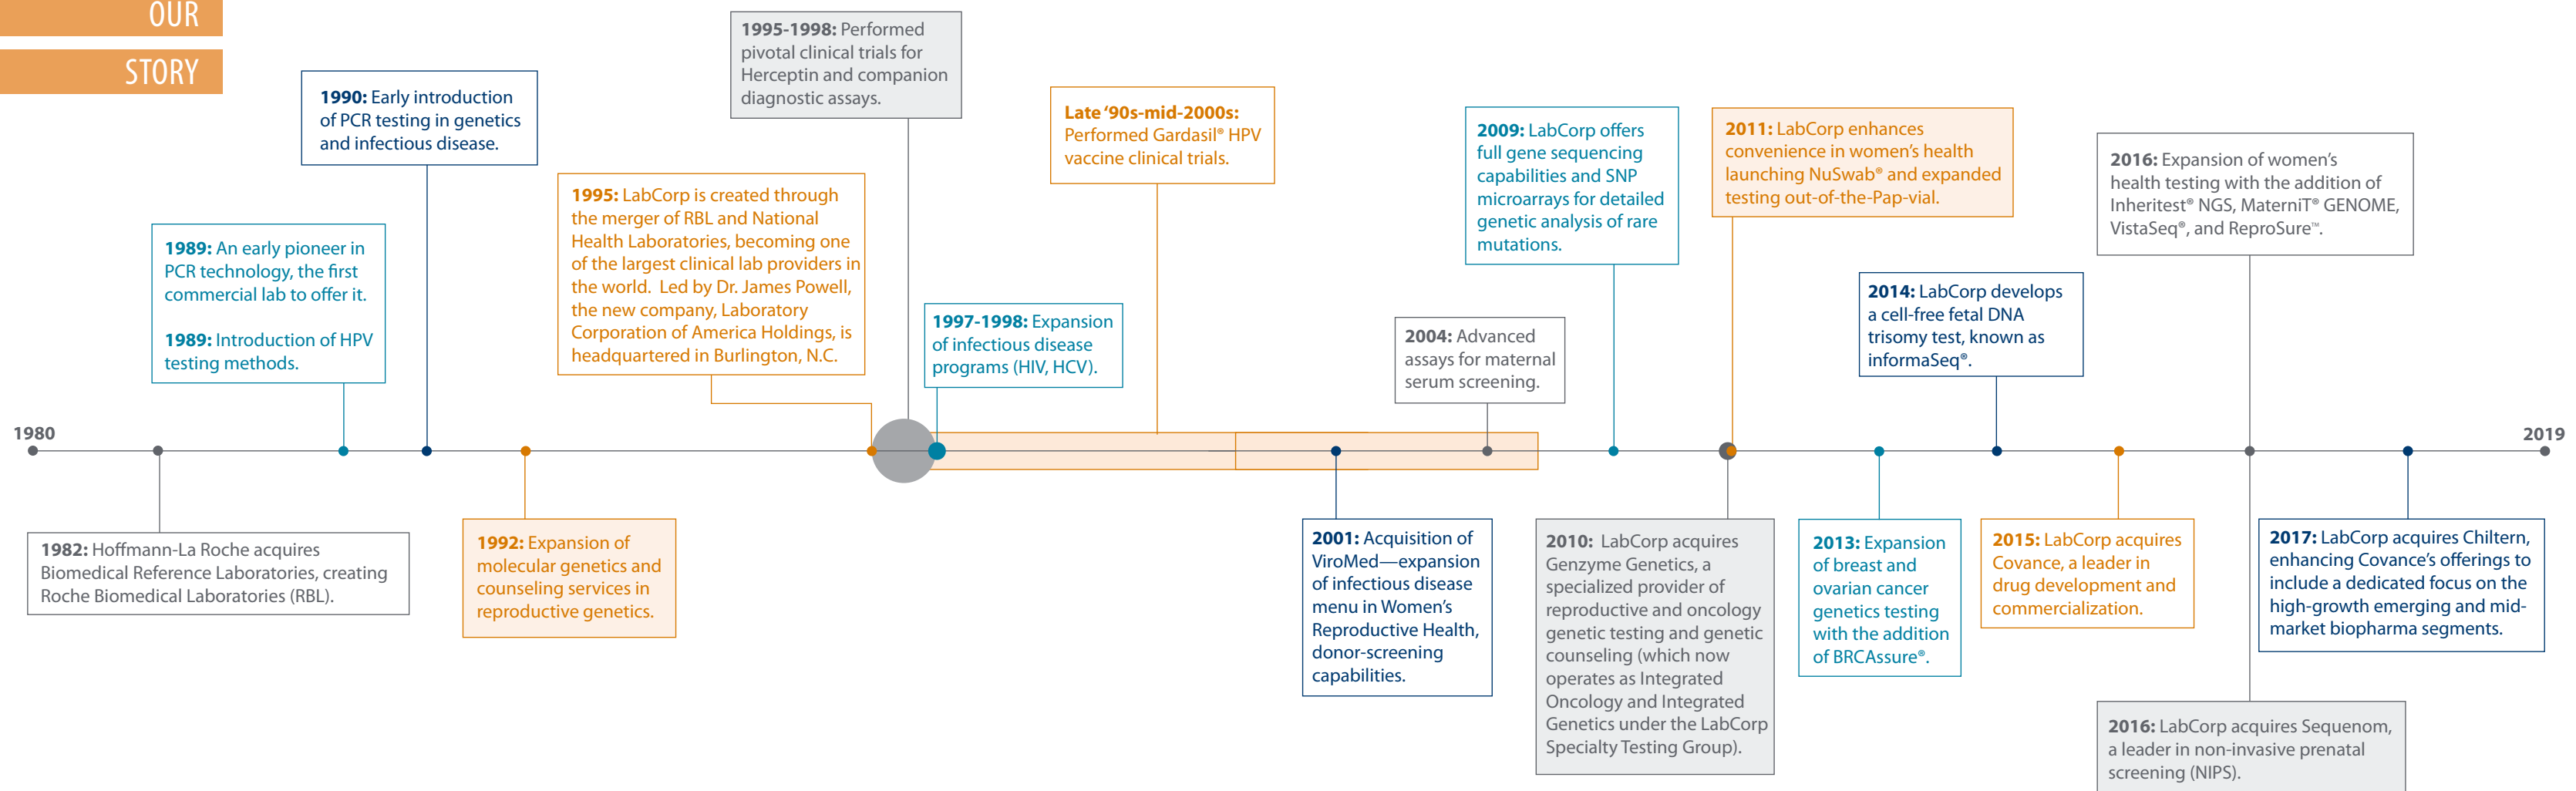

We prove our expertise in specialized testing daily, with more rare tests available than any other lab of our size.

When you're helping a patient who presents with a complex set of symptoms, you need to trust that the lab you're working with has the test options and experience you require—even if it's a specialized test you may order only **once a year**. We take pride in offering a large menu of specialized tests that can assist you in delivering the best care possible to the patients who depend on you.

OUR

STORY

TAKING TESTING INNOVATION

TO THE NEXT LEVEL

While we offer a full range of routine tests for women's health, we're also pioneers in the lab industry, pushing the boundaries of what's expected in laboratory science by helping to develop *extraordinary scientific testing advances*.

Currently, we provide laboratory testing for clinical trials in approximately 100 countries around the world, often with the same tests you order every day. In fact, our senior scientific team reviews more than 100 new tests and methodologies each year.

In addition, our tests are refined to provide the most clinically relevant information and regularly reviewed in terms of use and guidelines.

OUR TESTING INNOVATIONS GIVE YOU THE TOOLS TO CARE FOR A WIDER RANGE OF PATIENT CONDITIONS.

WE OFFER SPECIALIZED LABORATORY EXPERTISE IN GENETICS, ENDOCRINOLOGY, COAGULATION, AND INFECTIOUS DISEASES.

As one of the largest clinical laboratories in the world, and the largest standardized lab in the country, we can offer you a depth of experience and quality control in specialized testing that generates reliable results. Because we offer a growing menu of nearly *5,000 high-quality, high-value clinical laboratory tests*, our quality management programs employ sophisticated controls to assess accuracy and precision and allow us to detect variability.

To support our extensive testing capabilities, we have a large number of board-certified, fellowship-trained pathologists on staff who are available for consultation. We also staff one of the largest teams of regularly published and recognized scientists in the industry—engaging more than 600 MD- and PhD-level laboratory specialists who help provide a superior level of quality and expertise.

LabCorp and its Integrated Genetics Specialty Testing Group, provides a team of more than 130 genetic counselors to help patients understand their genetic risks and testing options.

EVERYTHING YOU NEED FROM A LAB

A COMPREHENSIVE TEST MENU
TO CARE FOR WOMEN'S HEALTH

When you order tests for your patients, you want to be assured of the same level of patient care that you provide in your practice every day: the same availability of resources, the same attention to detail, access to expert opinions, responsiveness and sense of urgency.

We offer nearly 5,000 tests, including the latest specialized and genetic innovations – so you can be sure to get the right test for the right patient at the right time. LabCorp and its specialty testing groups combined are a one-stop lab resource offering an exceptionally deep and broad menu of tests specific to women's health.

ANNUALLY, LABCORP PERFORMS:

+250 MILLION
WOMEN'S HEALTH TESTS

+33 MILLION
INFECTIOUS DISEASE TESTS

+26 MILLION
CARDIOVASCULAR TESTS

+7 MILLION
STD TESTS

+6 MILLION
PAP TESTS

+6 MILLION
INFERTILITY TESTS

+2.5 MILLION
SURGICAL BIOPSIES

+1.9 MILLION
REPRODUCTIVE/INHERITED GENETICS TESTS

WE HAVE THE TESTS YOU NEED TO CARE FOR AND
DIAGNOSE WOMEN THROUGHOUT THEIR STAGES OF LIFE

A woman's health needs change over the years. **Count on LabCorp** for a full range of women's health testing options to help you provide the best in patient care for each patient, whatever her phase of life.

AGES

13-18

1 in 2 people diagnosed with an STI will acquire it by age 25.¹

As part of LabCorp's STI test portfolio we offer the Aptima Combo 2® assay for simultaneous detection and differentiation of *Chlamydia trachomatis* (Ct) and *Neisseria gonorrhoeae* (Ng) employing nucleic acid amplification technology (NAAT). NAATs are preferred by the CDC for Ct and Ng.²

19-39

1 in 8 couples in the US deal with infertility issues.³

LabCorp has developed the nation's premier service for the reproductive health specialist. From routine screening to complex genetic analysis, LabCorp's solution is designed to improve patient care and treatment in the areas of infertility and assisted reproduction.

40-64

7 in 10 women who have a regular doctor and had health insurance have not been screened for cervical cancer in the last five years.⁴

LabCorp offers an innovative age-based test protocol for cervical cancer screening to help individualize patient care. Clinicians can order a single test number that will individualize cervical cancer and STD testing based on the patient's age (21 to 65) in accordance with the American College of Obstetricians and Gynecologists (ACOG) guidelines.

65+

Approximately **5 to 10** percent of cancers are thought to be caused by mutations in genes that are associated with hereditary cancer syndromes.⁵

Integrated Genetics, a part of LabCorp Specialty Testing Group, offers the VistaSeq Hereditary Cancer panel designed to provide information that can be used to determine if there is an increased cancer risk in patients with an associated personal or family history.

FIND OUT MORE AT

LABCORP.COM

WE OFFER NEARLY 5,000 TESTS, INCLUDING
THE LATEST SPECIALIZED AND GENETIC INNOVATIONS.

WOMEN'S HEALTH WELLNESS

- Age-based test protocol for cervical cancer and STD screening
- Expanded out-of-the-vial testing for HPV, chlamydia, gonorrhea, trichomonas, and HSV 1 and 2
- Celiac, inflammatory bowel, and Crohn's disease profiles
- Medical drug monitoring testing to monitor narcotic compliance
- Program for chronic kidney disease with clinical decision support
- Testosterone by mass spectrometry to assess low levels in women
- Thyroid cascade
- Vitamin D to assess deficiency

CARDIOVASCULAR AND DIABETES

- Advanced lipid testing including NMR LipoProfile®
- Diabetes testing menu including HgbA1c
- Genetic tests for inherited cardiac disease, including genetic lipid disorders
- Lipid cascades for step-wise evaluation of patients with cardio metabolic risk factors
- Testing for female-predominant CVD risk factors such as rheumatoid arthritis, systemic lupus erythematosus, scleroderma

INFECTIOUS DISEASE/ STDs

- Complete HIV test menu
- Comprehensive hepatitis testing options
- High-quality tests for chlamydia, gonorrhea, trichomonas, and HSV 1 and 2
- NuSwab
 - Single-swab convenience for bacterial vaginosis, candida species and 4 common STDs
- Rapid Plasma Reagin (RPR) test with reflex to *Treponema pallidum*
- *Treponema pallidum* (Syphilis) screening cascade

REPRODUCTIVE HEALTH

- Anti-Müllerian Hormone
- Evaluation of preeclampsia, miscarriage, and stillbirth
- FDA-registered donor screening laboratory for sperm/egg donors
- Pelvic inflammatory disease including Mycoplasma/Ureaplasma
- ReproSURE™ assay provides information on ovarian reserve
- Reveal® SNP Microarray — Products of Conception (POC)
- ThrombAssure™ - coagulation disorder
 - Advanced coagulation and inherited thrombophilias

PRENATAL AND PREGNANCY

- Comprehensive genetic carrier screening, including Inheritest, and common single-gene tests such as cystic fibrosis, SMA, and Fragile X syndrome
- Genetic analysis on amniotic fluid and CVS—using cytogenetics, FISH and Reveal SNP microarrays
- Gestational diabetes
- Maternal serum screening, including integrated and sequential
- MaterniT21, MaterniT GENOME, and informaseq non-invasive prenatal screening
- Prenatal infectious disease

CANCER

- BRCAAssure — BRCA 1/2 hereditary breast cancer
- Breast cancer testing services for tumor characterization
- Cervical cancer screening, HPV, mRNA, DNA, genotyping
- Epi proColon® for colorectal cancer
- Fecal occult blood test (iFOBT)
- Ovarian Malignancy Risk (ROMA®)
- Prosigna® breast cancer prognostic gene signature assay including ER, PR, HER2, Ki67, and HERmark®
- PD-L1 (22C3) by IHC in metastatic cervical cancer patients
- VistaSeq hereditary cancer panels

LabCorp and its Specialty Testing Group:

WOMEN'S HEALTH

PATIENT SERVICES

LabCorp, along with Integrated Genetics, has been a leader in providing ***genetic counseling services for more than 25 years.*** Validation of the credentials of our more than 130 genetic counselors is performed annually. This process includes documentation of ABGC certification, state licensure as applicable, and current CV information.

Genetic counselors provide a broad range of counseling services, including those for prenatal and preconception, infertility, and hereditary cancer. Our genetic counselors translate and communicate genetic information into practical, understandable terms. They identify genetic risks, explain appropriate genetic testing options, discuss the implications of test results, and help patients make informed and thoughtful genetic health care decisions.

Your time with patients is precious. We can help by supporting your patient's educational and counseling needs with access to our genetic counselors, patient education videos on genetics, telegenetic counseling services, and easy online appointment scheduling.

LabCorp Patient™ portal allows patients to access lab results. A mobile app is also available for download.

Patient Education Program

- **Patient Counseling Reports** – Helps patients understand their diagnosis and treatment options
- **Patient Literature** – Many resources available to help educate patients on women's health topics
- **Litholink Reports** – Physician/Patient counseling reports
- **BRCAssure Reports** – Guide to understanding results following hereditary cancer screening
- **Cost estimator** – The estimator service is enabled across the LabCorp PSC network and for LabCorp in-office phlebotomists. Estimates are customized for each individual and health plan. In addition, for select genetic testing, consumers can obtain cost estimates online without visiting a PSC.

Integrated Genetics Programs

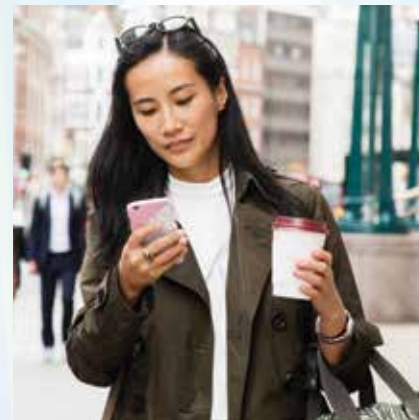

- **Patient Engagement Program** – Patients want to be clear about costs. Integrated Genetics offers programs that walk the patient through the process so you don't have to.
- **Transparent Pricing** – Integrated Genetics offers individualized patient support through our *Every Mom Pledge* team to save time for the practice and help patients understand their best option. We have relationships with over 400 plans in the US, which also helps patients with in-network options

INFRASTRUCTURE AND SERVICES

THAT WORK FOR YOUR PRACTICE

LabCorp offers a national network of **nearly 2,000 patient service centers**—meaning your patients have access to a wide range of locations, including at select Walgreens locations. Online appointment scheduling and Express Check-in at our PSC's speed the process for your patients. Our testing facilities adhere to rigorous quality control standards, so you can be assured of getting the right test result, wherever the test is performed. And our technological advances, both in and out of the laboratory, aid in accuracy and speed of lab results.

Online appointment scheduling makes it easy for your patients to book appointments online at any LabCorp location, which helps to minimize wait times.

Our world-class phlebotomy services, enabled by our proprietary AccuDraw® system, aid in accurate specimen collection and help expedite the draw process.

WE INVEST MILLIONS ANNUALLY IN TECHNOLOGY THAT HELPS REDUCE HUMAN ERROR AND ENHANCES TEST QUALITY AND RELIABILITY.

Specimens are carefully tracked from pickup through test result with advanced bar code technology and a powerful GPS tracking system originally developed by UPS®.

Many of our lab procedures are automated, including specific advances for certain HPV and hematology tests.

OUR STRENGTH, COMMITMENT TO INNOVATION, AND NEW TECHNOLOGY HELP DRIVE DOWN HEALTH CARE COSTS

While many labs bill health plans rates up to three times the amount we charge, LabCorp leverages our national infrastructure to better control laboratory-related health care costs, even for highly specialized tests. In fact, our size and strength afford us powerful economies of scale. The benefit? **We're one of the most efficient lab providers in the country**, which contributes to lower out-of-pocket expenses for your patients—all without compromising quality.

WE PROVIDE DEDICATED SERVICE MANAGERS BACKED BY INDUSTRY-RECOGNIZED MEDICAL DIRECTORS, PHD-LEVEL SCIENTISTS, AND GENETIC COUNSELORS.

COMMITMENT TO PERSONAL SERVICE

Because we understand that your daily focus is to provide exceptional patient care, our focus is to provide you with **dependable personal service** that's designed to ease the demands of managing tests—so you can get back to what you do best.

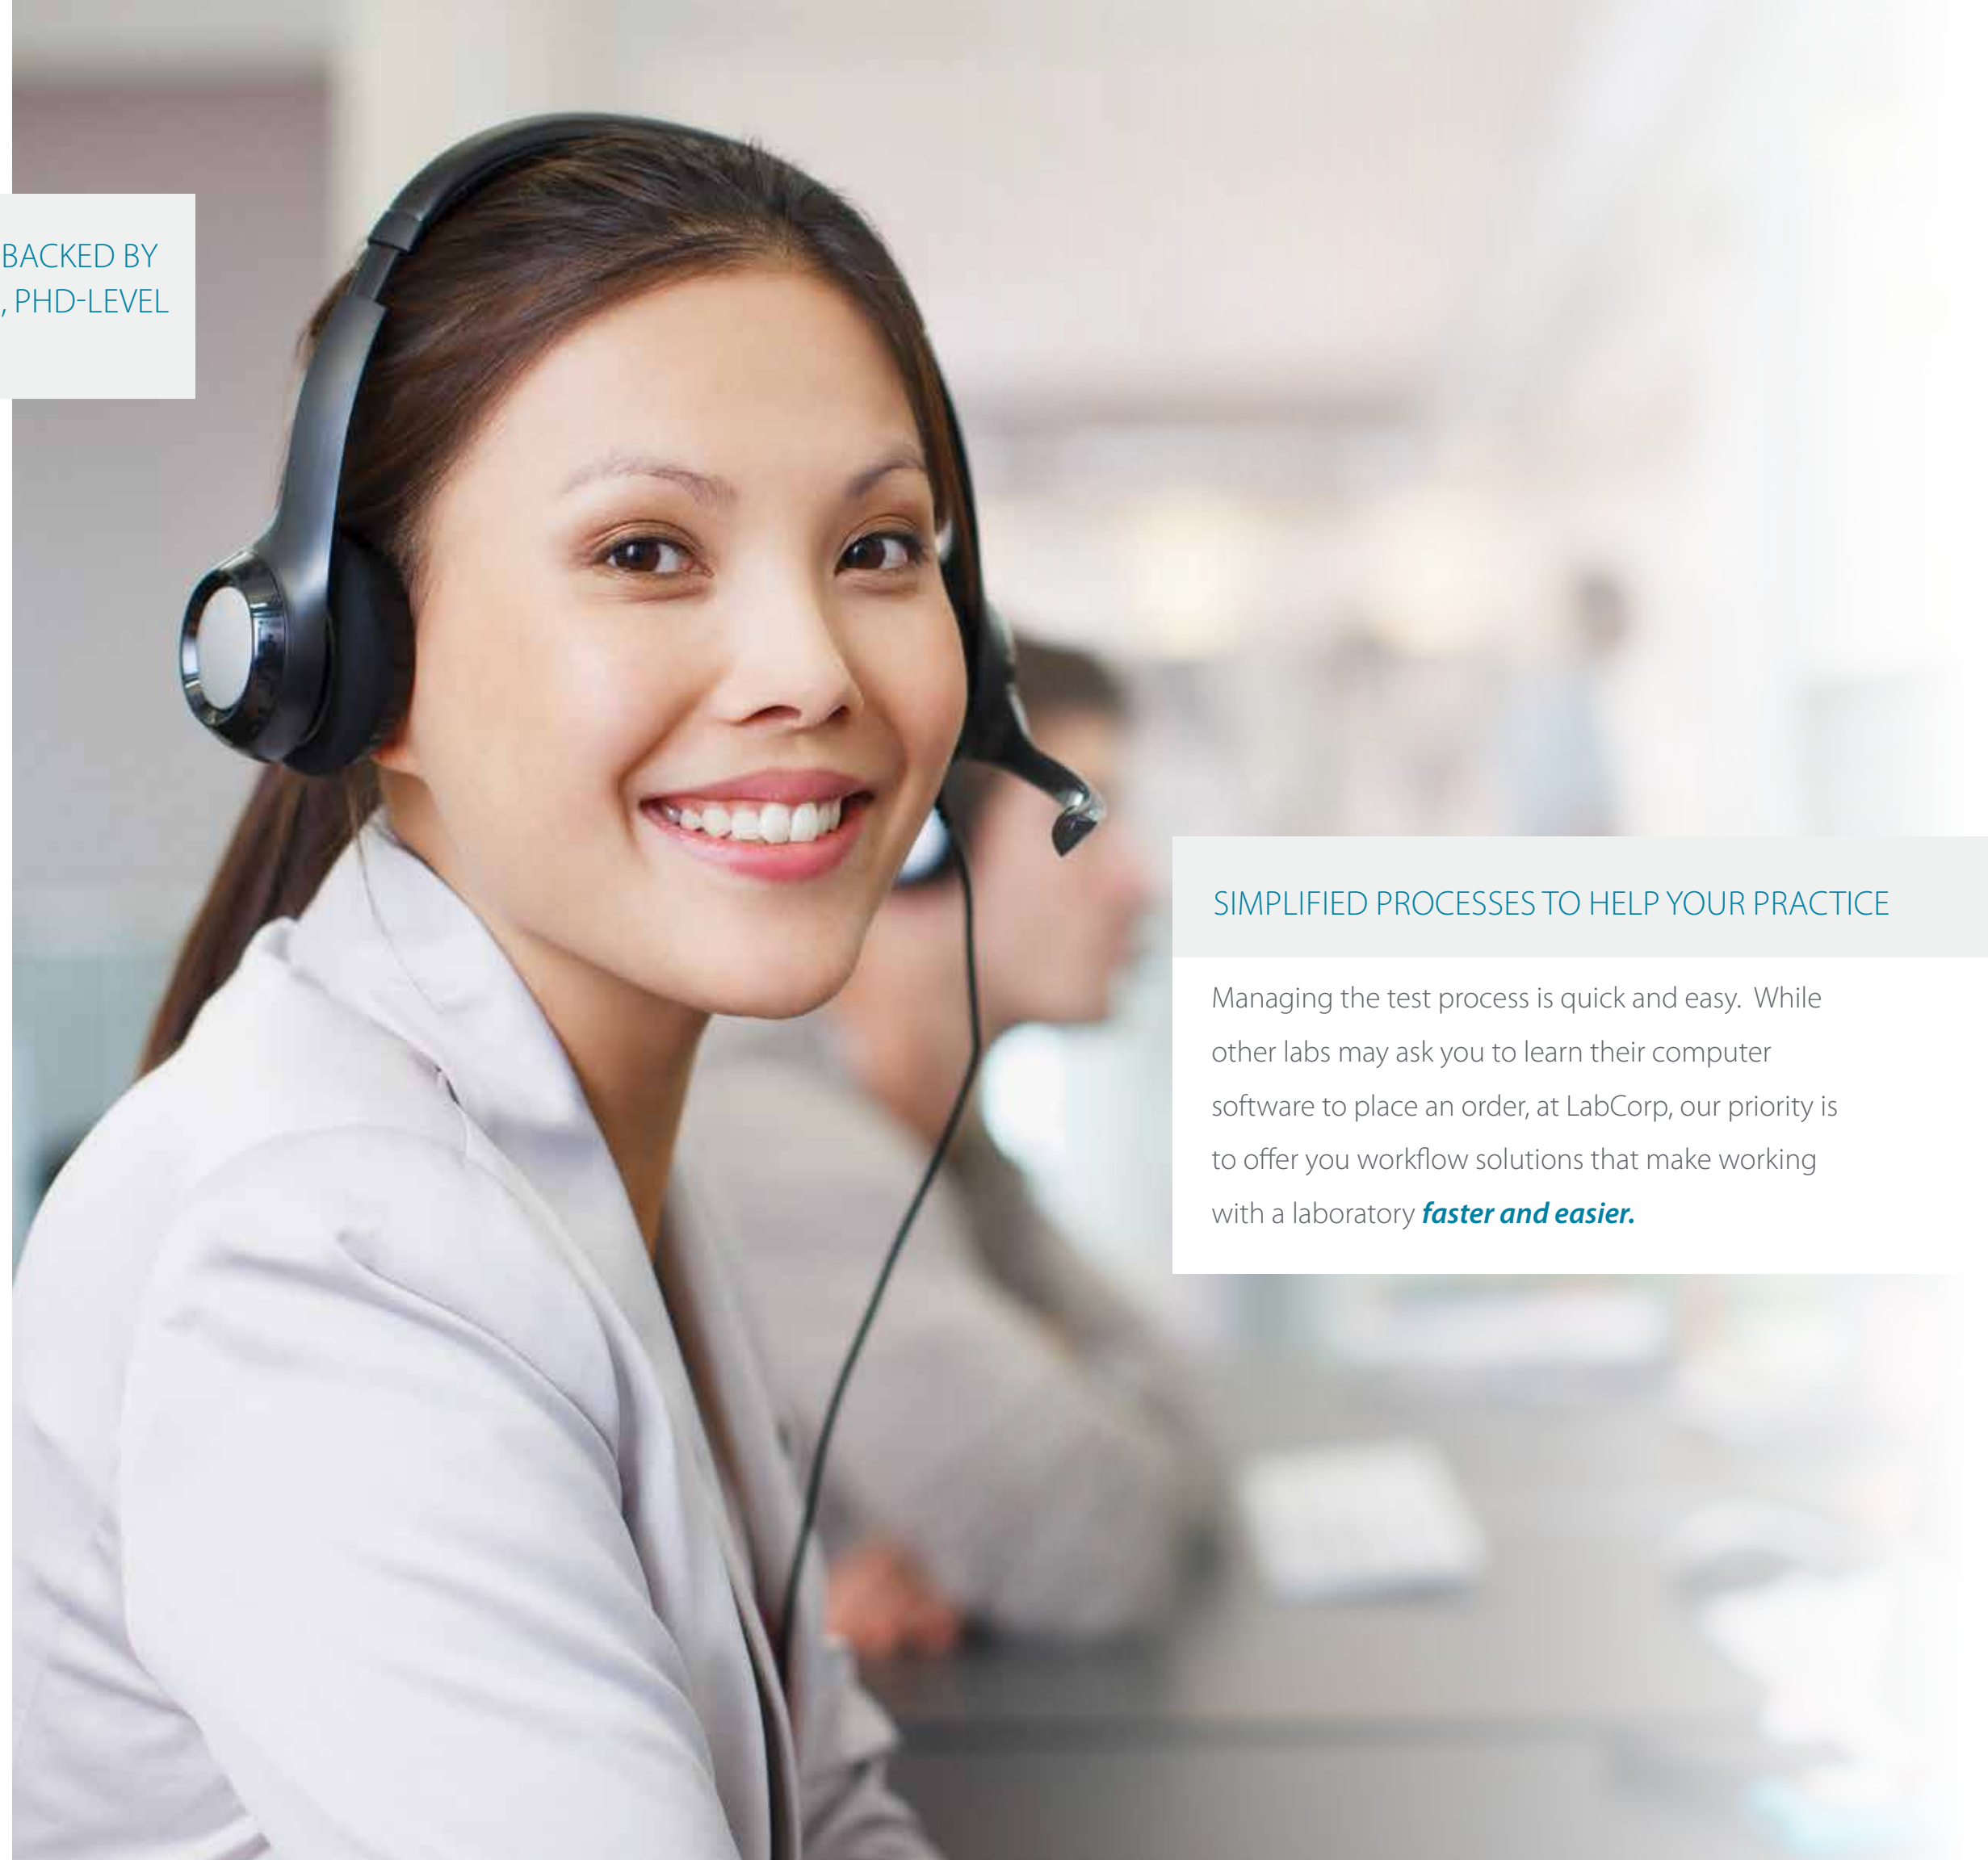

To assist your practice, we provide a dedicated account management team to serve as your direct liaison to LabCorp. This single, go-to resource for your practice will take the time to understand your needs and is available to help you if challenges arise.

We value open communication with physicians, and offer ongoing access to pathologists and test experts to review unusual results. You may also consult with our genetic counselors. LabCorp performs such a high volume of tests, that we see a broad range of results and our experience provides valuable insight into findings that may be atypical.

To further assist your patients, we also offer educational videos and literature that can help them make sense of test results and medical information. We offer patient brochures on topics like prenatal genetic screening or patient counseling reports that are delivered to you with Pap results. In addition, we offer physician counseling reports for tests such as quantity of female egg production. Many of these resources are available in English and Spanish.

SIMPLIFIED PROCESSES TO HELP YOUR PRACTICE

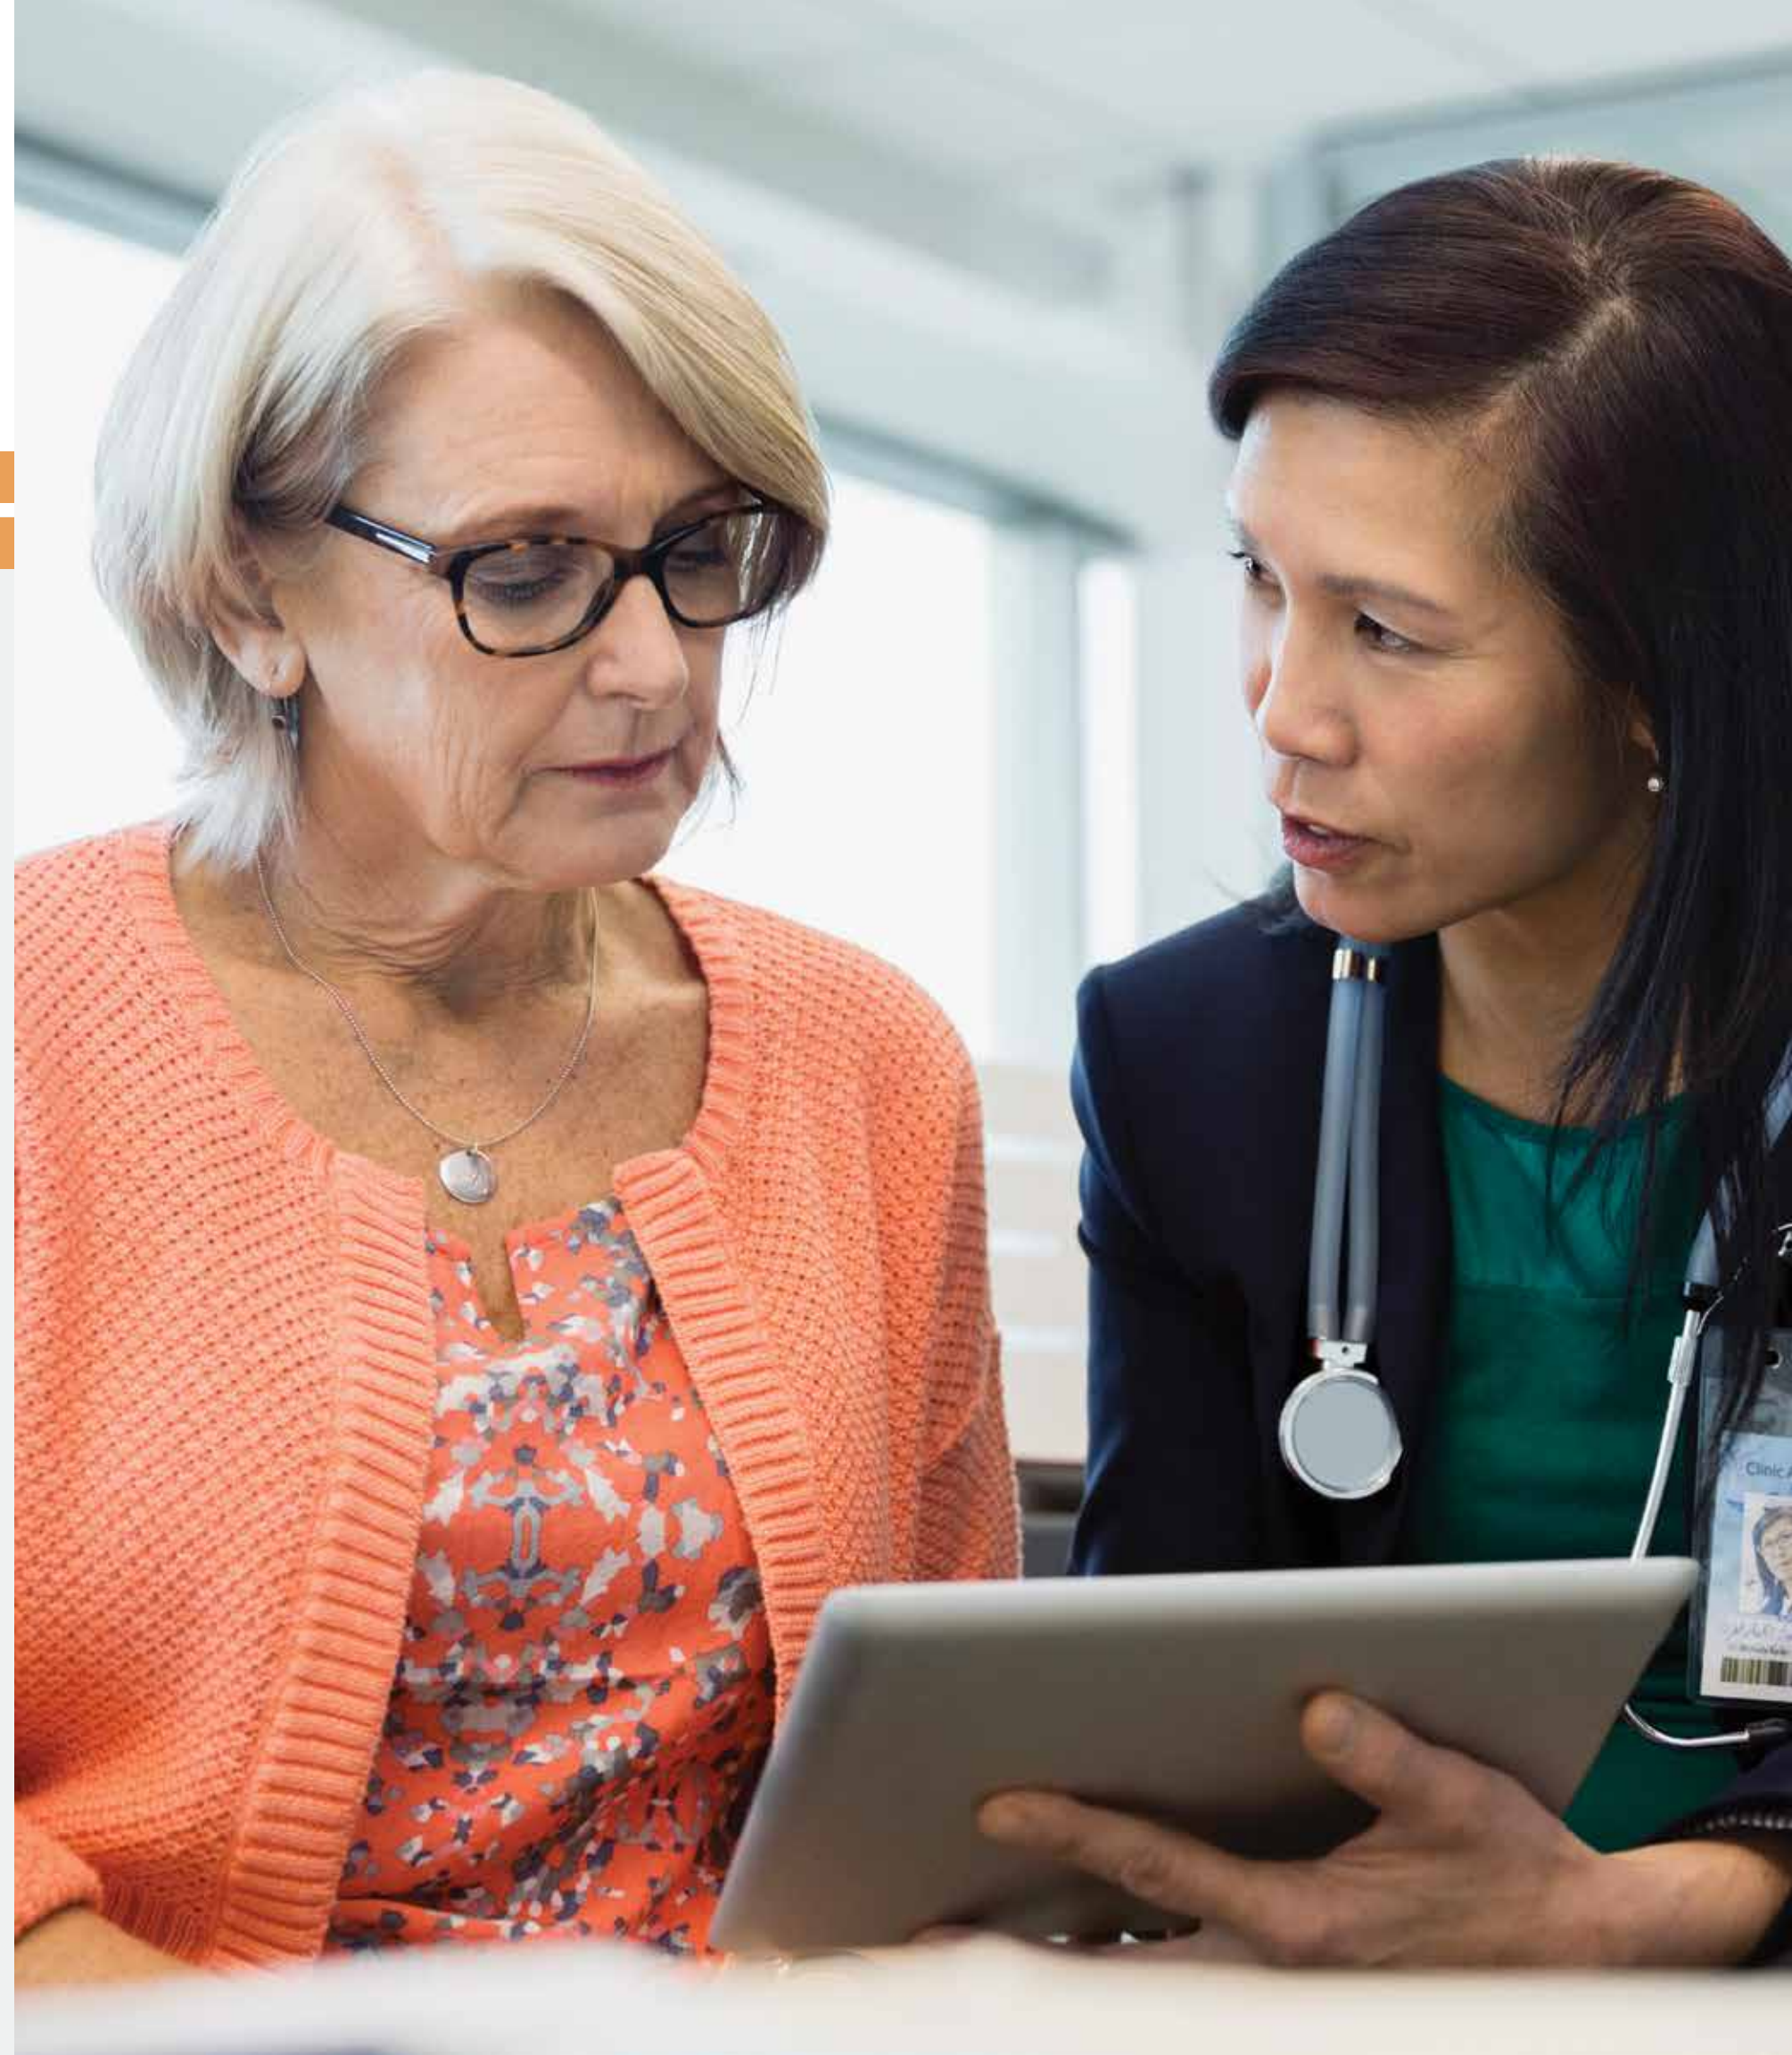

Managing the test process is quick and easy. While other labs may ask you to learn their computer software to place an order, at LabCorp, our priority is to offer you workflow solutions that make working with a laboratory **faster and easier**.

WE WORK SMARTER SO
YOU CAN WORK BETTER

With LabCorp, processing test orders and managing results are simpler tasks, thanks to our adaptable tools and easy-to-use technical solutions that help streamline your workflow. The result? ***Your practice may save time, energy and avoid unnecessary expense.***

We can provide lab ordering and resulting solutions accessible via the Web, or we can interface with software already used by your practice. We have implemented more than 65,000 interfaces with more than 600 electronic health record (EHR) providers, including eClinicalWorks®, Epic, AllScripts, Athena Health, Nextgen, Greenway Medical Technologies, and Change Healthcare. Our technical expertise helps us quickly implement interfaces to your EHR system, which offer both workflow and patient management benefits to your practice.

WORKING WITH ELECTRONIC HEALTH RECORD PROVIDERS

Today, the field of medicine is increasingly digital. Technology makes it possible to retrieve critical information more quickly, share information between providers, analyze patient data and communicate patient information with just a click. LabCorp understands the need for technical solutions in addition to your testing needs, and is also *leading the way with innovations* that work harder for your practice.

Our strong relationships with EHR providers allow us to offer you seamless integration among software platforms, so your practice can optimize your workflow. These relationships also allow us to offer your practice more patient-centered features than many other labs:

- **Abnormal results flagging**—Quickly alerts you to abnormal results to allow for timely intervention.
- **Results trending**—Enables you to monitor and trend a patient's lab results (including Pap) from a single screen embedded in the patient's EHR.
- **2D bar codes**—Reduces manual errors by adding a bar code to an EHR-generated lab order that accompanies your patient's specimen to LabCorp.
- **Advance Beneficiary Notice (ABN) Notification**—Makes it easy for you to see, within an EHR, when you have ordered lab tests that require an ABN to be signed by the patient.
- **Integration with LabCorp patient service centers**—Electronically sends lab orders directly to our draw sites, with no paper script or order form required.

ENHANCES PATIENT CARE

LABCORP LINK™

ENHANCED ONLINE ACCESS TO YOUR TESTS

Every day, health care professionals rely on LabCorp for timely, accurate lab results to help improve patient care. LabCorp Link™ is an online gateway to order, view, share, manage, and analyze lab results — anytime, anywhere. Developed with input from physicians and their staff, LabCorp Link is easy to use and integrates quickly and seamlessly into your office workflow. With innovative tools to enhance your office's efficiency and strengthen information sharing, **LabCorp Link allows you to spend less time on administrative tasks and more time on patient care.**

GLOBAL PATIENT SEARCH

WITH JUST A FEW CLICKS, MULTI-PROVIDER RESULTS SEARCH LETS YOU EASILY SEARCH FOR LAB RESULTS ORDERED BY ANOTHER MEDICAL PROVIDER, GIVING YOU A COMPREHENSIVE REVIEW OF YOUR PATIENT'S TESTING HISTORY.*

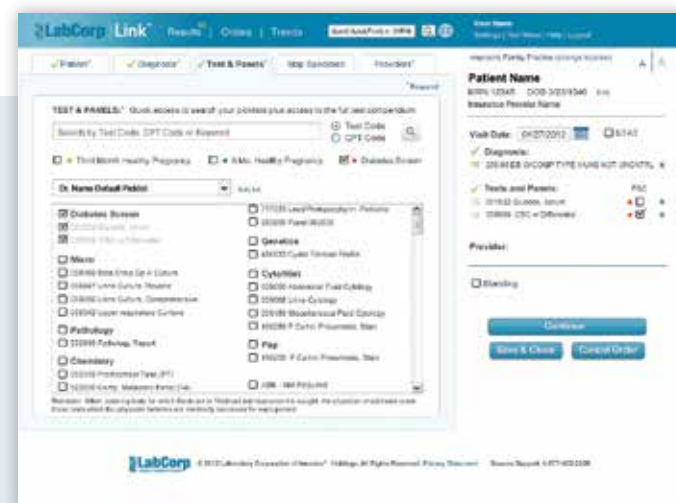

UNCLUTTERED, INTUITIVE INTERFACE

Clean, straightforward home page provides both instant information and direct access to critical features.

SECURE ACCESS

Strong passwords, multi-factor authentication, and autolock features help ensure the safety and privacy of your practice's information.

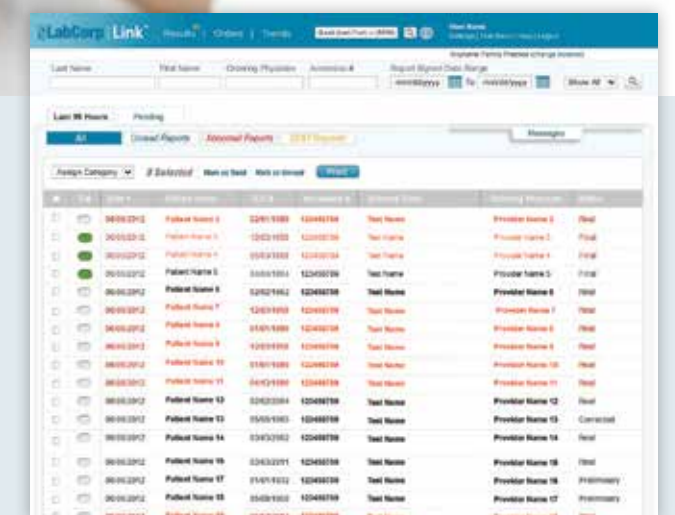

SIMPLIFIED ORDERING

Streamlined functionality for ordering tests and adding tests after the order is submitted. Easy order view lets you see the order on the right of the screen as it builds. Create groups of tests based on your practice's needs to simplify ordering. Automate routine tasks, including Medicare medical necessity checks and generating ABNs.

ENHANCED SPECIMEN COLLECTION WITH ACCUDRAW®

LabCorp Link combines visual cues with detailed specimen collection requirements to present collection, handling, and shipping instructions that ensure accuracy and precision.

VIEW REPORTS

See recent results in the Reports Inbox and sort or search by date, patient, accession number, or provider. Select one or many reports to save, print, or share with others.

CUSTOMIZABLE CATEGORIES

LabCorp Link allows you to assign your own color designations easily.

* To access the Global Search feature, a physician must have a LabCorp Link account and the physician must agree to the Global Search Terms of Use. Global Search is only permitted when the physician is in a treatment relationship with the patient.

FOCUS ON

WOMEN'S HEALTH

As your partner in women's health, our expertise can help you distinguish your practice by offering your patients convenience and technology benefits that can *enhance accessibility and foster trusted relationships.*

DECADES OF EXPERIENCE WITH WOMEN'S HEALTH PROGRAMS

- **Women's Health Email Program** – Opt in to receive updates about new women's health tests and services
- **Partners in Pregnancy Program** – From preconception to delivery, LabCorp and Integrated Genetics offer a full range of tests for obstetric care to help you and your patients navigate the pregnancy continuum.
- **Women's Health Wellness Program** – “Wellness at every age” preventive care guidelines. Women's health wellness assessments provide an opportunity for physicians to counsel patients about preventive care. These assessments may include laboratory screening, evaluation, and counseling at varying intervals.

WHEN YOU CHOOSE A LABORATORY TESTING PARTNER, **THINK LABCORP FIRST.**
