LabCorp Specialty Testing Group

Expand your view of what
laboratory services mean

Combined, LabCorp, Integrated Genetics, and LabCorp's other specialty testing labs offer nearly 5,000 tests, including the latest specialized and genetic innovations – so you can be sure to get the right test for the right patient at the right time. Our experience from performing over 250 million women's health tests per year, and our exceptionally deep and broad women's health-specific test menu offers you the latest science available to help care for your patients.

Prenatal testing	Women's health
<ul style="list-style-type: none"> • MaterniT® 21 PLUS <ul style="list-style-type: none"> • GENOME-Flex option • MaterniT® GENOME • Genetic analysis of amniotic fluid and CVS – using Reveal® SNP Microarray, cytogenetics, and FISH • Maternal serum screening including integrated and sequential • Gestational diabetes • Reveal® SNP Microarray for products of conception (POC) 	<ul style="list-style-type: none"> • LabCorp has developed the nation's premier service for the reproductive health specialist. From routine screening to complex genetic analysis • NuSwab® – single swab convenience for bacterial vaginosis, candida species, and 4 common STDs • Age-based test protocol for cervical cancer and STD screening – expanded out-of-the-vial testing for HPV, chlamydia, gonorrhea, trichomonas, and HSV 1 and 2 • ReproSURE™ assay provides information on ovarian reserve
Carrier screening	Cancer testing
<ul style="list-style-type: none"> • Inheritest® selection of panels <ul style="list-style-type: none"> • Including new Inheritest 500 PLUS Panel • Single gene testing, including cystic fibrosis, SMA and fragile X syndrome 	<ul style="list-style-type: none"> • BRCAssure® <i>BRCA1</i> and <i>BRCA2</i> analysis • VistaSeq® hereditary cancer panels • Cervical cancer screening, HPV, mRNA, DNA, and genotyping

Partnering with Integrated Genetics and LabCorp for all of your patient needs can help assist you in delivering the best possible care, while helping improve practice efficiency and management. Outcome? More time for you and your practice, so you can focus on the quality of patient care and practice growth.

Whether you want to order a cutting-edge genetic test, or the most common women's health test, you can have peace of mind that Integrated Genetics, a member of the LabCorp Specialty Testing Group, will be with you through every step of each woman's health continuum.

A comprehensive genetics
and women's health test menu
covered by a single laboratory

- **Best-in-class/leading non-invasive prenatal screening** – MaterniT21 and MaterniT GENOME
 - **Comprehensive genetics carrier screening** – Inheritest carrier screen and single-gene tests such as cystic fibrosis and SMA
 - **Cancer testing** – BRCAAssure hereditary cancer testing, VistaSeq hereditary cancer panels, cervical cancer screening, and others
 - **Nearly 5,000 other, high-quality, high-value clinical laboratory tests** – including additional reproductive health, prenatal/pregnancy and infectious disease testing
-
- **Extensive in-network status** – we are in network with most major health plans (including many with a preferred status) including Aetna, Anthem, Cigna, Humana, UnitedHealthcare, and most Blue Cross plans, helping your patients save on out-of-pocket costs
 - **More than 2,000 patient service centers** – for convenient access to a wide range of specimen collection sites including inside select Walgreens locations

For your practice

We work harder so you can work smarter – physician services that help streamline your workflow, saving time and energy, so you can focus on your patients

- **Dedicated reproductive genetics sales team** – a single go-to resource to understand your needs and to help you if challenges arise
- **Electronic Health Records connectivity** – interfaces with more than 600 EHR providers to help your practice with test ordering and results delivery
- **LabCorp Link™** – an online gateway to order, view, share, manage and analyze lab results – anytime, anywhere, allowing you to spend less time on administrative tasks and more on patient care
- **Partners in Pregnancy Program** – from preconception to delivery, LabCorp and Integrated Genetics offer a full range of tests for obstetric care to help you and your patients navigate the pregnancy continuum
- **Value-based Care** – we can help you meet quality and cost metrics required by payers

Integrated Genetics has been a leader in providing genetic counseling services for more than 25 years.

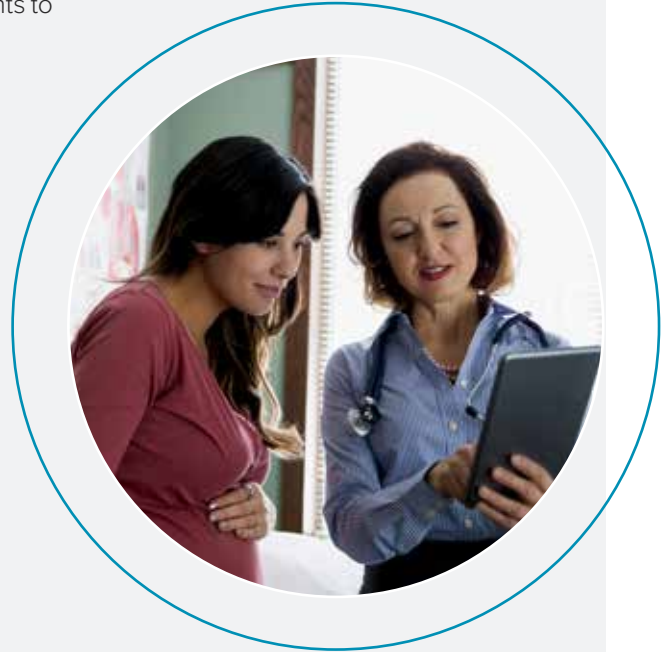

Genetic Counseling is an integral part of the services we provide. With our national network of board-certified and state-licensed genetic counselors and medical geneticists, we provide accessibility to genetics expertise and a broad range of services tailored to you and your patients.

Your time with patients is precious. We can help by supporting your patient's educational and counseling needs with access to our genetic counselors, patient education videos on genetics and telegenetic counseling services. To learn more call **855-GC-CALLS (855-422-2557)** or to view our Genetic Education Video Series visit www.integratedgenetics.com/videos.

For your patients

Patient engagement tools – helping to provide price transparency and access to affordable genetic testing and education for patients:

- **Patient Engagement Program** – we work directly with your patients to make pricing options transparent and our services accessible
 - For reproductive genetic testing, patients can obtain online cost estimates within minutes, while our expert *Every Mom Pledge* team offers rapid, proactive support to help patients understand their best option. Send your patients to www.integratedgenetics.com/transparency or call 844.799.3243
- **Cost estimator** – For other women's health tests, the estimator service is enabled across the LabCorp PSC network and for LabCorp in-office phlebotomists. Estimates are customized for each individual patient and health plan
- **Patient Education and Support**
 - Patient literature – Many resources are available to help educate patients on genetics and women's health topics
 - Patient counseling reports – Help patients understand their diagnosis and treatment options
 - BRCAssure Reports – Guide to understanding results following hereditary cancer testing
 - Patient genetic education videos are available on www.integratedgenetics.com/videos
- **Genetic counseling services** – we offer the largest national commercial network of more than 130 genetic counselors to help patients understand their genetic risks and testing options via both results and comprehensive counseling
 - Genetic counseling services focused on prenatal and preconception, infertility and hereditary cancer
 - Telegenetic counseling via audio and video connection is available so patients can receive services when and where it is convenient for them
 - Patients can schedule an appointment at www.integratedgenetics.com/genetic-counseling

- **LabCorp Patient Portal, LabCorp Patient™ Mobile App and Express Check-in** – allow patients to easily access lab results, schedule phlebotomy appointments, and check-in online
